

## Selin's Miniature Dollhouse

### WHAT YOU NEED:

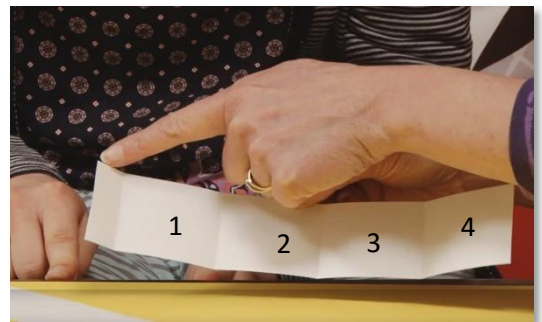

A4 paper  
scissors  
glue  
mini pictures of furniture etc

### WHAT YOU DO:

Cut your A4 paper into strips around 6cm wide, lengthways. Fold each strip into 5 squares, around 6cm long. You'll have 5 squares.

Cut the majority of the end square off, so you're left with a 1cm tab.

Open the strip out and lay it flat on the table.

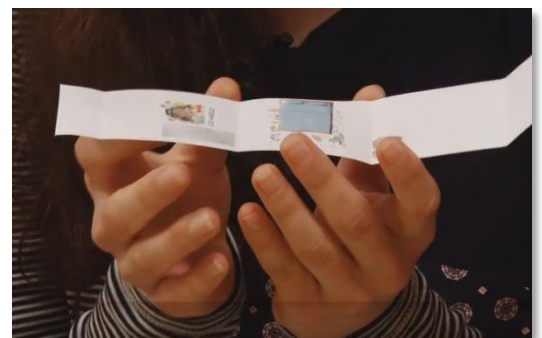

Use your glue stick to spread glue on the back of the small pictures of furniture, rugs, picture frames, pot plants etc as you want to place each image inside your house.

Start with the floor rug for the room and glue it in square 2 on the strip.

If it's a bedroom, place the bed on this square.

Then place any windows, doors or pictures on square 1 and 3.

Spread glue along the tab and stick the tap to the ceiling square (4), then place it aside to dry and move on to the rest of the house/shopping mall, apartment block or even castle!

Have fun! And maybe send us a picture of your snail robot when you're finished :o)
