

## Green Fairy Chain

### WHAT YOU NEED:

paper  
pencil/pen  
scissors  
glue  
the help of an adult  
things to decorate your fairies with (felts/crayons/fabric etc)

### WHAT YOU DO:

Fold your sheet of paper in half from end to end.  
Fold one half of the sheet back on itself.  
Flip the paper over and do the same to the other half.

You'll end up with a fan of folds 8-)

On the top piece draw your fairy or trace around the fairy template, below. Make sure that something on both sides of the fairy touches both edges of the paper.

Then carefully cut around the shape, with scissors, cutting through all the layers at once.

Spread your fairy chain out flat and get magical with your decorating.

Once the chain is dry you can use it to decorate your room, or even your Christmas Tree! Join several chains together to make a longer fairy chain.

For other ideas, arts, crafts and games head to my website and head to the YouTube channel, for the video of this craft.  
And if you make a paper chain yourself, I'd love to see it xox
